

# Achieving CMMI Level 3 Compliance

## Overview:

Our client is a government-backed company that helps people manage their federal student loans. They can answer questions, process payments, and help you find the best repayment plan.

- **Project Business Case:** The company must achieve the CMMI (Capable Maturity Model Integration), Maturity Level 3 by July 2024. The Capability Maturity Model Integration is a process improvement, training, and appraisal program required by many U.S. Government contracts, especially software development contracts.
- **Project Objective:** The CMMI initiative began in early 2023 to support the government contract award. Under the contract's requirements, the customer must achieve CMMI (Maturity Level 3) Version 3.0 by July 2024.
- **Project Benefits:** The client meets the US Government contract requirements for CMMI-Dev, ML-3.

## Client Challenge:

Resources and teams changed during the creation and implementation of ML-3 processes. Previous training and processes needed to be more suitable for rolling ML-2 practices into ML-3 solutions.

## Solution:

Theoris deployed a senior CMMI Consultant to provide guidance, training, and oversight until the end of the Benchmark Appraisal.

## Result:

The client was Benchmark-Appraised for CMMI-Dev (Version 3.0) at Maturity Level 3 on time.

**Technologies:** The CMMI Model v.3.0

**Solution Type:** CMMI Consulting

**Industry:** Finance
