

Cost-Effective Technical Talent Solutions Without Compromising Quality

Scale Smart with Nearshore Staffing from Theoris

Nearshore Staffing Services

What Can Theoris Do for You & Your Business?

For over 40 years, Theoris has delivered services and solutions to industries like life sciences, healthcare, manufacturing, and financial institutions. With our nearshore staffing model, we provide a hybrid approach that blends cost savings with high-quality results.

Our nearshore IT and engineering teams operate within U.S. time zones, enabling real-time collaboration and faster response times. They offer specialized technical expertise across a range of platforms and languages, all while maintaining clear communication and consistent project delivery.

By combining nearshore and onshore resources, Theoris ensures seamless service scalability, agility, and quality at a fraction of the cost.

Time Zone Compatibility

Our teams operate in U.S. Central and Mountain time zones, ensuring real-time communication and faster response times.

Cost Reduction

Our pricing is more competitive than competitors, offering high-quality service at a fraction of U.S. hiring costs.

Technical Talent

Programmers and consultants that work across the SDLC are skilled in a wide variety of platforms and languages to complete all types of projects.

Customized Team

Our nearshore teams collaborate with our onshore resources to provide expert, agile project delivery with consistent communication.

English Proficiency

Being the second most commonly spoken language in Latin America, our technical staff can effectively communicate with your team.
